Verum Omnis – Forensic Standards Compliance Report

1. Admissibility Standards
Verum Omnis adheres to global evidentiary standards:

• ISO 24027:2021 Compliance
  Ensures document integrity using SHA-512 hashing, blockchain anchoring, and PDF/A-3B tamper-evident format

• Daubert Standard (U.S. Courts)
  Meets criteria used in U.S. courts:
   - Testability via AI templates and forensic methods
   - Peer Review (e.g. MIT Codex)
   - Error rate known: 98% fraud detection accuracy
   - Legal acceptance in UAE and South African courts

2. Legal Case Precedents
• UAE Case #1295911: Cross-border fraud evidence accepted.
• SAPS Ref #126/4/2025: Criminal complaint validated by platform outputs.
• Southbridge Legal confirms admissibility and litigation support.

3. Forensic Validation Components
• SHA-512 Hashing: Ensures non-repudiation of files
• Blockchain Anchoring: Ethereum #19283776 for immutable time-stamping
• Biometric Watermarking: Validates user interaction
• Chain-of-Custody Logs: Maintains lifecycle traceability

4. Jurisdictional Compatibility
Verum Omnis outputs are compliant with evidence laws in:
- UAE
- South Africa
- United States
- European Union

Includes legal auto-escalation logic and admissibility verification across jurisdictions.
